SIYA PARIKH

Graphic Designer

I am a young 14-year-old with enough drive for years to come. In my life, I would like to hone my skills and expertise along with my passion for using technology to drive success in the business world. My journey began with a fascination with how technology can streamline the world's operations, and enhance efficiency. I truly believe my array of skills can highly benefit your organization.

Qualifications

Coding using HTML and Python
2019-2024

I believe I am proficient in HTML and Python. Over the past 5 years, I have used python in robotics and even competed with other students throughout Ontario. Moreover, this year, in my BTT course I have learnt how to use HTML throughout various areas including making a working website!

My BTT course
In grade 9

During my BTT course, I developed essential skills in web design, database management, writing letters, communicating thoroughly, and business software applications such as Excel. I am keen to apply these teachings to real-world scenarios and optimize my business and technology journey in my life. Due to this, I believe I will be a great addition to your company.

Work Proficiency
Efficiency in the workplace

I developed essential skills in business software applications such as Excel this year. This will allow me to work quicky with efficiency in the workplace, and get my work done! I can say that I am greatly experienced with Microsoft Office Suite including Word, PowerPoint, and Excel. Using these software's have also allowed me to apply skills to real-world solutions.

Experience

Volunteering at Megamind Academy

Volunteering at Religous places

Gaining awards at Dance competitions, Kumon, and at school for Empathy, Collaboration, and Compassion
